13. The Inner Courtyard
14. The South Wing

Welcome to Chedworth Roman Villa, one of the grandest country houses of fourth century Roman Britain

Chedworth Roman Villa was discovered in 1864 when a gamekeeper, out ferreting for rabbits, found small stone cubes – loose tesserae – from one of the buried mosaics.

The site was swiftly dug to reveal extensive walls, bath houses and fine mosaics from one of the most significant Roman villas in Britain.

The 19th century landowner, Lord Eldon, maintained timber shelter buildings over the most delicate ruins, and had a small museum for the artefacts. The estate was sold in the 1920s and the Villa was bought for the nation through public subscription.

Chedworth Roman Villa was at its greatest in the fourth century, as a large and luxurious country house, with many domestic comforts such as underfloor heating and two bath houses.

In 2011 the site underwent a major renovation, with a brand new shelter building to protect the fragile remains, new museum displays and many more ways to learn about life in the Villa during the 'Golden Age' of Roman Britain.
